CSCS 342: Web Application Development
Assignment 2

Task:

Write a program in JavaScript which takes three paragraphs as input and computes the following tasks.
1. Print all the words, each of which is present in all the three paragraphs.
2. Highest occurring word in the first paragraph.
3. Highest occurring word in the Second paragraph.
4. Highest occurring word in the Third paragraph.

Important:

- Make a folder and rename it with your roll number only.
- Make an external JavaScript file and add all code in it. Rename it with your Name-RollNumber.js (else you will not get any marks for it)
- Take inputs and display result in a single HTML file. The name of your HTML file will be YourName_RollNo.html

Note:

- Do not plagiarize. This can lead to a straight F in the course.
- Proper plagiarism detecting software will be used to detect the plagiarism. Do not share your code with anyone.
- Zip your HTML and JS files. Name this zipped folder as "YourRollNo" ONLY and drop it in the respective Assignment # 2 submission folder at Moodle before: [Deadline: 7th December 2022 before 11:59PM]. It will be LOCKED later.
- Copied assignments will be marked ZERO.
- Late submissions will NOT be entertained.
- Email Submissions will NOT be accepted at all.
- Deadline will NOT be extended.

Submission Deadline: 7th December 2020 before 11:59PM
